

Project-Portfolio

Welcome to My Project Portfolio as here I have displayed some of my previous University/School coding projects I have created.

1. ChatBot My Features that I created (Language: Python):
 - i. Movie Search Engine (using API)
 - ii. Entertainment News (using API)
 - iii. Sports News (using API)
2. Membership Management Prototype (Language: Java):
 - i. Includes GUI, Controller class
 - ii. Database used for prototype (MySQL)
3. RV vs The Haters (Language: Game Maker Language):
 - i. A video game I coded from scratch which is fully functional for an A Level Coursework and this is able to be played on download. (instructions within the game).
 - ii. A video of the Game running along with tests I ran on it:
